2015 DPER MT0021938 EPA comments.doc
2015 FS MT0021938 EPA comments.doc

Hey,

I asked Tina to look at the permit too since she's so involved with all of the nutrient stuff. The attached FS has edits/comments from both of us. I just left hers as-is instead of editing. I ended up just inserting comments into the permit. All of our comments are clarifications and editorial stuff. Nice job. Let me know if you have questions.

Lisa

Thanks Lisa.

Not to put too much pressure on, but ideally I would be able to make any necessary revisions and turn it in by the 18th. So... I might need a day or two ahead of that if you can manage it (unless you don't see the need for any changes ☺).

Thanks,

-J

Lisa:

Kalispell fact sheet and draft permit attached. Sorry for the confusion. I thought you had already received hard copies of these.

Hopefully you'll find this one a bit better than Missoula. Based on our meeting last week, I think the nutrient approach will meet with EPA approval. We've already had some pushback from the City over holding them to the current permit's nitrogen limit year round, but I don't think we can relax it any. I look forward to your take on it.

If at all possible, I'd like to get this to our admin staff by the 18th to prepare for public notice on the 30th.

Sorry for the short turnaround request. If you can't get to it, we can probably push it back some more.

Thanks,

Jeff
